Professional Summary

Principal AI Architect & Engineering Leader with 8+ years of experience steering enterprise digital transformations and 0-to-1 AI platforms. Proven track record scaling platforms from high-volume mobile banking (200k+ MAU) to enterprise B2B automation systems (1,000+ clients). Expert in bridges the complex HK regulatory/fintech logic with modern Agentic AI workflows (Cursor, LLM/RAG, n8n) and leading multi-region cross-border squads.

Core Competency

AI & Automation: Cursor.ai, Vertex AI, LLM/RAG, n8n, Data Validation Pipelines, Workflow Automation
Frontend & Mobile: Flutter (BLoC/Atomic Design), Next.js, React, TypeScript, Tailwind CSS, Angular, GatsbyJS
Backend & Data: Node.js, Express.js, PostgreSQL, Firestore, MongoDB, DynamoDB
Cloud & DevOps: Firebase, Google Cloud, AWS, Docker, GitLab CI/CD, Deployment Workflow Design
Delivery & Leadership: Agile/Scrum, Solutions Architecture, Architecture Review, Cross-Border Squad Management, Technical Pre-Sales & Demos
Analytics & Growth: Technical SEO, GA4, Google Tag Manager, Performance Optimisation.

Experience

Founding Engineer (AI & Solutions) | DataDasher Limited | May 2026 - present

Spearheaded technical launch as the founding HK engineer, driving solution feasibility studies, enterprise client requirement mapping, and on-site technical demos for wealth management clients across Hong Kong.

Architected domain-specific AI customizations, extracting key financial taxonomies and HK regulatory frameworks to engineer compliant data extraction/RAG pipelines for localized wealth management workflows.

Optimized AI-assisted engineering velocity, leveraging Cursor.ai to refactor rapid LLM-generated proof of concepts (PoCs) into enterprise-grade, highly scalable production systems.

Coordinated cross-border engineering deliverables across US headquarters, Hong Kong, and Vietnam squads while mentoring newly onboarded HK engineering talent.

Tech Stack: Cursor.ai, LLM/RAG Engineering, React/Next.js, Node.js, AI Customization, API Integrations

Lead Engineer | Leadsourcing | Nov 2024 - Apr 2026

Architected and deployed the 0-to-1 full-stack platform (Next.js, Firebase, Tailwind UI), scaling a B2B automation engine from concept to serving 1,000+ active client accounts.

Engineered an autonomous AI validation engine leveraging Vertex AI, n8n orchestration, and custom Node.js microservices to automate bulk data processing and CRM integrations (HubSpot/Slack).

Designed multi-tenant data architecture and real-time workflows using Firestore security rules and n8n event handling, ensuring strict data isolation and reliable automation for enterprise clients.

Tech Stack: Next.js, Vertex AI, N8N, Firebase, Tailwind UI, Node.js

Experience

System Analyst | The Bank of East Asia (BEA) | Jan 2024 - Oct 2024

Led the end-to-end technical development of a new Flutter/BLoC mobile application, architecting the integration strategy to connect the app with existing enterprise backend systems.

Accelerated project kickoff through rapid prototyping, bridging the gap between business stakeholders and integration teams to reduce technical clarification cycles by 50%.

Governed system architecture and sprint delivery within a highly regulated banking environment, ensuring zero-rework execution and strict adherence to security protocols.

Tech Stack: Flutter (BLoC), REST APIs, GitLab CI/CD, Jira

Senior Software Engineer | Livibank Limited | Mar 2021 - Sep 2023

Architected the core mobile banking app revamp using Atomic Design and BLoC pattern, delivering scalable Flutter components and state management for 200,000+ active users (rated 4.6/5).

Established enterprise CI/CD standards from scratch via GitLab Pipelines, automating multi-environment deployment workflows for 20+ developers across Hong Kong and Shenzhen squads.

Spearheaded mission-critical CMS migration from Java Magnolia to Node.js (Strapi) and Next.js admin dashboards, hands-on engineering backend APIs and migration scripts to cut infrastructure running costs by 50%.

Tech Stack: Flutter, BLoC Pattern, Next.js, Strapi (Node.js), GitLab CI/CD, Tailwind UI, Java Magnolia

Senior Software Engineer | Nova Credit Limited | May 2020 - Jan 2021 | Project-based

Architected a high-volume GatsbyJS/React credit-checking dashboard and drove Scrum transformation across cross-border engineering teams (HK & Mainland China).

Tech Stack: GatsbyJS (ReactJS), PostgreSQL, Git Lab Pipeline, cypress.io

Full Stack Developer | Imisure Life Limited | Nov 2018 - May 2020

Architected a greenfield Next.js PWA scaling to 22,000 MAU via technical SEO, while automating GitLab CI/CD pipelines to eliminate staging conflicts and accelerate releases.

Tech Stack: NextJS, GitLab with Git Flow, ExpressJS (NodeJS), Cypress.io, GA4, Google Tag Manager

Developer | Appcider Limited | Aug 2017 - Sep 2018

Engineered multi-carrier logistics API gateways & e-commerce plugins (Shopify/Shopline) with an Angular tracking dashboard and Odoo ERP integration for retail digitalization.

Tech Stack: Django, DynamoDB, Angular, Odoo, PostgreSQL, Payment Gateway, AWS, AlibabaCloud

Education and Certification

The Chinese University of Hong Kong (CUHK), Hong Kong

Sep 2013 - Jul 2017

- Bachelor of Science in Computer Science (Distributed Systems, Networks & Network Security)
